

Have you noticed that human bodies come in all different sizes, shapes, and shades? People's bodies look so different.

Most human bodies look pretty much the same to me.

They do?

They do.

Oh, come on! You do know that male and female bodies look different from one another?

Do we have to talk about this—now—here—or anytime?

What's the big deal?

Let's just forget we ever had this conversation, okay?

OUR BODIES 21

## 15 Perfectly Normal Masturbation

Some people think that masturbation is wrong or harmful. And some religions call masturbation a sin. But masturbating cannot hurt you. And it does not result in pregnancy or in getting or passing on infections that are spread through sexual contact.

Many people masturbate. Many don't. Whether you

masturbate or not is your choice. Masturbating is perfectly normal.

When people masturbate, they usually rub their sex organs with their hands or with something soft, like a pillow.

Girls often rub their clitoris; boys often rub their penis. Both the clitoris and the penis are sensitive to touch.

PUBERTY 51

IT'S PERFECTLY NORMAL

to sexual intercourse—at any time and for any reason. Sexual intercourse usually begins with two people touching, caressing, kissing, and hugging each other.

After a bit, a person's vagina becomes moist and slippery, and the clitoris becomes hard. After a bit, a person's penis becomes erect, stiff, and larger. Sometimes a bit of clear fluid that may contain a few sperm comes out of the tip of the penis and makes it wet. This is usually when two people begin to feel excited about each other.

But in fact, there are different kinds of sexual intercourse—vaginal intercourse, oral intercourse, and anal intercourse.

When a person with a female body and a person with a male body are having vaginal intercourse, the erect penis goes into and inside the vagina, which stretches in a way that fits around the penis. The wetness from the vagina makes it easier for the penis to go into the vagina.

Vaginal intercourse is also called vaginal sex. As the two people move back and forth in rhythm, the movement of the penis inside the vagina soon feels very good. They may hug and kiss and touch each other

## It's Perfectly Normal

Highly objectionable country-wide. on cover: For Ages 10 and up. Was in JMCL children's area - with our objection moved to Adult, but still easily accessible by any age according to their 'Policy'.

Breaks TN Code Title 39 laws.

### 5 Who We Are Straight, Lesbian, Gay, Bisexual, Transgender, Queer, Questioning, +

**S**traight, lesbian, gay, and bisexual are words that have to do with sex because sex is also about sexual desire—the sexual feelings we may have toward another person. The words *sexual orientation* are words that have to do with sexual attraction.

Being sexually attracted to another person has to do with those sexual feelings one has toward that person. People do not choose their sexual orientation. Often it takes time for kids and for adults to figure out their sexual orientation. And different people have different sexual orientations.

A person who is straight is someone who is sexually attracted to people of another gender—someone who is not the same gender as they are. Heterosexual is another name for a straight person. *Heteros* is the ancient Greek word for other.

In a straight relationship, two people of different genders—a male and a female—are sexually attracted to, and may have loving feelings for or fall in love with, or may have a sexual relationship with each other.

A person who is gay is someone who is sexually attracted to people of the same sex or gender. *Homosexual* is another name for a gay person. *Homos* is the ancient Greek word for same. Now most people use the word *gay* instead of the word *homosexual*. In a gay relationship, two people
